

u2d_msa_sdk Module

.services.wdc

Attributes

__version__ module-attribute

```
__version__ = '0.0.8'
```

Functions

createEntity async

```
createEntity(  
    paragraph: WDCParagraph,  
    ent,  
    optionCountry: bool,  
    optionOrg: bool,  
    optionDensity: bool,  
    optionNatural: bool,  
    langcode: str,  
)
```

createEntityOnly async

```
createEntityOnly(  
    text: str,  
    type: str,  
    start: int,  
    end: int,  
    pageid: int = -1,  
    paraid: int = -1,  
    senid: int = -1,  
    misc=None,  
)
```

createEntitySimple async

```
createEntitySimple(
    paragraph: WDCParagraph,
    text,
    type,
    start,
    end,
    misc,
    x,
    senx,
)
```

createNewDoc async

```
createNewDoc(inputText: str, langcode: str = 'en')
```

createNewMLDoc async

```
createNewMLDoc(
    data: dict,
    langcode: str = "en",
    optionTargetFields: str = "IMPULSKATEGORIE, IMPULSART",
    optionTrainFields: str = "SACHVERHALT",
)
```

createNewParagraphs async

```
createNewParagraphs(
    page: WDCPage,
    sdu_page: SDUPage,
    parmove: int,
    optionSentiment: bool,
    langcode: str,
)
```

createParagraph async

```
createParagraph(par, x)
```

createToken async

```
createToken(
    tok,
    optionDensity: bool,
    optionNatural: bool,
```

```
    langcode: str,  
)
```

createTriple async

```
createTriple(triple: Dict, x)
```

createWord async

```
createWord(wrd)
```

getCompleteRoleFromDep async

```
getCompleteRoleFromDep(dep) -> str
```

getResultDependencies async

```
getResultDependencies(doc: WDCDocument)
```

getResultEntities async

```
getResultEntities(doc: WDCDocument)
```

getResultEntitiesGroups async

```
getResultEntitiesGroups(doc: WDCDocument)
```

getResultPages async

```
getResultPages(doc: WDCDocument)
```

getResultParagraphs async

```
getResultParagraphs(doc: WDCDocument)
```

getResultSentences async

```
getResultSentences(doc: WDCDocument)
```

getResultTokens async

```
getResultTokens(doc: WDCDocument)
```

getResultTriples async

```
getResultTriples(doc: WDCDocument)
```

getResultWords async

```
getResultWords(doc: WDCDocument)
```
