u2d_msa_sdk Module

.admin.utils.translation

Attributes

i18n [module-attribute]

```
i18n = I18N()
```

Classes

I18N

Caching is used to prevent re-reading the environment every time the translated str object is used.

load_translations

 ${\tt load_translations(translations: Dict[str, GNUTranslations])}$

Load the GNUTranslations.

PARAMETER	DESCRIPTION
translations	<pre>the dict with the GNU Translations TYPE: Dict[str, GNUTranslations]</pre>

set_language

set_language(language: str = None) -> str

Set the i18n localization language.

If it is empty, try to read the environment variable LANGUAGE / LANG, the system default language, in turn.

PARAMETER	DESCRIPTION	
language	the language to try to set TYPE: str	DEFAULT: None

RETURNS	DESCRIPTION
str	the language after the successful setting
