msaSDK Module

`.auth.auth.backends.base`

Classes

BaseTokenStore

Bases: `Generic[_TokenDataSchemaT]`

Attributes

TokenDataSchema `instance-attribute`

```
TokenDataSchema = TokenDataSchema or BaseTokenData
```

expire_seconds `instance-attribute`

```
expire_seconds = expire_seconds
```

Functions

__init__

```
__init__(
    expire_seconds: Optional[int] = 60 * 60 * 24 * 3,
    TokenDataSchema: _TokenDataSchemaT = None,
) -> None
```

destroy_token `async`

```
destroy_token(token: str) -> None
```

read_token `async`

```
read_token(
    token: Optional[str],
) -> Optional[_TokenDataSchemaT]
```

write_token `async`

```
write_token(
    token_data: Union[_TokenDataSchemaT, dict]
) -> str
```
