Release Notes

Possible future features:

- Add examples for Admins Pages and additional features of the Admin and auth module

- versioning? FastAPI versioning

- camel case support FastAPI-CamelCase

- Feature Flags: Own Implementation Boolean, Multivariates, Temporary, Permanent, PaidUsers, ClosedBeta, PercentageOfUsers, Experimental, DefaultFallbackHandler=func, ConditionalFeature

- Feature Switch with Conditions based on Pydantic Models, switch can have conditions or just on/of and conditions cheack against an existing pydantic or sqlmodel

- fastapi_socketio?

- Events lib? FastApi Events or FastAPI Websocket Pub/Sub fastapi-cloudevents? Webhook receive? Seems we need a combination of some

0.1.5

- Cleaned Static Files

- Optimized logging as the * import from justpy and rocketry overrides the logging with INFO

- Fixed some typo in Docs

- Added more examples docu

- Added Web UI Examples

- Fully integrated JustPy 0.9.2 into msaSDK as the original JustPy is just not build for full integration in FastAPI, makes things easier

- Added signal module, as decorator and middleware plus the option to mount middleware in MSAApp via settings

- Added storagedict: Dicts who can sync themself to data storage backends, like redis, zookeeper.

- Added dynaconf: Can be used as a second option for own Settings handling.

- BUG: in logger fixed, uvicorn handler wasnt empty list, corrected this (Some log messages were duplicated)

0.1.4

- Integrated PyFilesystem2 as Abstract Filesystem for the Service

- Integrated msaSDk and FastAPI Docs in Admin API Docs as IFrame Pages

- Integrated justpy WEB UI Framework into MSAAPI Class

0.1.3

- merged fileupload and fileutils modules into refactored file module

- added TinyDB as JSON Storage into MSApp

- changed Scheduler from own implementation to https://rocketry.readthedocs.io/en/stable/index.html

- added some more docstrings

- changed readme.md links for images

- reduced size of logo_big

- automation of doc for requirements now also documents required packages from the ones installed by requirements.txt file

0.1.2

This is the first public release of msaSDK, former releases are all stages of development and internal releases
