u2d_msa_sdk Module

`.services.wdc`

Attributes

__version__ `module-attribute`

```
__version__ = '0.0.3'
```

Functions

createEntity `async`

```
createEntity(
    paragraph: WDCParagraph,
    ent,
    optionCountry: bool,
    optionOrg: bool,
    optionDensity: bool,
    optionNatural: bool,
    langcode: str,
)
```

createEntityOnly `async`

```
createEntityOnly(
    text: str,
    type: str,
    start: int,
    end: int,
    pageid: int = -1,
    paraid: int = -1,
    senid: int = -1,
    misc=None,
)
```

createEntitySimple `async`

```
createEntitySimple(
    paragraph: WDCParagraph,
    text,
    type,
    start,
    end,
    misc,
    x,
    senx,
)
```

createNewDoc async

```
createNewDoc(inputText: str, langcode: str = 'en')
```

createNewMLDoc async

```
createNewMLDoc(
    data: dict,
    langcode: str = "en",
    optionTargetFields: str = "IMPULSKATEGORIE, IMPULSART",
    optionTrainFields: str = "SACHVERHALT",
)
```

createNewParagraphs async

```
createNewParagraphs(
    page: WDCPage,
    sdu_page: SDUPage,
    parmove: int,
    optionSentiment: bool,
    langcode: str,
)
```

createParagraph async

```
createParagraph(par, x)
```

createToken async

```
createToken(
    tok,
    optionDensity: bool,
    optionNatural: bool,
```

```
      langcode: str,
)
```

createTriple `async`

```
createTriple(triple: Dict, x)
```

createWord `async`

```
createWord(wrd)
```

getCompleteRoleFromDep `async`

```
getCompleteRoleFromDep(dep) -> str
```

getResultDependencies `async`

```
getResultDependencies(doc: WDCDocument)
```

getResultEntities `async`

```
getResultEntities(doc: WDCDocument)
```

getResultEntitiesGroups `async`

```
getResultEntitiesGroups(doc: WDCDocument)
```

getResultPages `async`

```
getResultPages(doc: WDCDocument)
```

getResultParagraphs `async`

```
getResultParagraphs(doc: WDCDocument)
```

getResultSentences `async`

```
getResultSentences(doc: WDCDocument)
```

getResultTokens `async`

```
getResultTokens(doc: WDCDocument)
```

getResultTriples `async`

```
getResultTriples(doc: WDCDocument)
```

getResultWords `async`

```
getResultWords(doc: WDCDocument)
```
