# msaSDK Module

`.server.srv_uvicorn`

## Attributes

### __version__ `module-attribute`

```
__version__ = '0.1.0'
```

## Classes

### MSAServerUvicorn

#### Attributes

##### app `instance-attribute`

```
app: str = app
```

##### app_dir `instance-attribute`

```
app_dir: str = app_dir
```

##### host `instance-attribute`

```
host: str = host
```

##### log_config `instance-attribute`

```
log_config = uvicorn.config.LOGGING_CONFIG
```

##### log_level `instance-attribute`

```
log_level: str = log_level
```

## port `instance-attribute`

```
port: int = port
```

## reload `instance-attribute`

```
reload: bool = reload
```

## workers `instance-attribute`

```
workers: int = workers
```

**Functions**

**__init__**

```
__init__(
    app: str,
    app_dir: str,
    host: str,
    port: int,
    reload: bool = False,
    log_level: str = "info",
    workers: int = 1,
) -> None
```

**run**

```
run()
```
