msaSDK Module

`.auth.auth.schemas`

Classes

BaseTokenData

Bases: `BaseModel`

Attributes

id `class-attribute`

```
id: int
```

username `class-attribute`

```
username: str
```

UserLoginOut

Bases: `BaseUser`

Attributes

access_token `class-attribute`

```
access_token: str = None
```

password `class-attribute`

```
password: SecretStr = None
```

token_type `class-attribute`

```
token_type: str = 'bearer'
```

UserRegIn

Bases: `UsernameMixin` , `PasswordMixin` , `EmailMixin`

Attributes

password2 `class-attribute`

```
password2: str = Field(
    title=_("Confirm Password"), max_length=128
)
```

Functions

passwords_match

```
passwords_match(v, values, **kwargs)
```
